

Crestline Cleaning and Maintenance

Clean-up after installation:

Abrasive cleaners may scratch and dull the finish.

After installation use water, mild non-abrasive soaps and a soft cloth such as microfiber.

Do not use the abrasive side of the sponge, it is normally green.

Do not use metal scrapers, wire brushes or other metal tools.

Maintenance:

It is recommended to routinely clean the unit with Clorox bleach. Any non-abrasive bathroom cleaner with Clorox bleach is acceptable.

If disinfectant is used After 5 minutes of carrying out the disinfection process, the cleaning process should proceed, long exposure times of sodium hypochlorite, hydrogen peroxide, quaternary ammonium and other disinfection products can generate deterioration in the high pressure laminate.

For cleaning difficult stains such as: Tea, coffee, pencil, chalk, grease stains, dust or soap residue, use household cleaning agents such as grease remover soaps, Banner cleaner for dust and shine, odorless varnish, window cleaner, liquid soaps, or 0.1% strength sodium hypochlorite solution. It is important that the cleaning is done for a maximum of 5 minutes and then thoroughly clean the surface with water and a clean cloth.
